February 21st, 2017

Greetings

I am writing to express my interest in your Staff Hydrologic Data Analyst position. I discovered this position after meeting one of your interns at the USF career fair and signing up for job notifications on www.governmentjobs.com. I have had my eye on working with this company since I started my Environmental Science degree at USF, I am a Florida native and know the area well.

I am graduating this Spring from USF with my Bachelors in Environmental Science & Policy. I have been focusing on the GIS field and have a great passion for field world and office and lab work related to this position. I also have experience working with microscopes, data collection, writing reports, AutoCad/ArcGis and am highly trained in Microsoft office.

My background is in consulting for construction litigation cases ranging from safety cases to site work or building defects. I am comfortable with reading plans and blueprints, or other documents such as permits and Florida codes & laws. I have been in the field for 10+ years and I know that I would make a great asset to the team over at SWFWMD.

I would love to schedule an interview to talk about this position and elaborate more on my skillset involved with the duties requested for this job. You can reach me by phone at XXX-XXX-XXXX or by email at mtbstevenson (at) gmail.com. I have attached my resume for your review. Thank you for your time and I look forward to meeting with you.

Sincerely,

Jason Stevenson
